### Text Response

Outstanding. Would appreciate being able to see the last video that was not shown. Wondering how to access Having the Conversation 2.

Delightful presenters. I hope the woman with the medical issue is all right.

This was really good too.

Exceptional.

Thought provoking material.

Awesome and inspiring. Clearly these 2 speakers are very dedicated, thoughtful, and involved in their work. Nice to see people who are passionate about what they do, and can convey their message in a very moving way. Excellent!!!

Excellent and interesting piece. I will be watching this series.

Great stories

Would have purchased their DVDs if available at conference. They could be invited again, due to the foreshortened presentation.

I've seen their films before and heard them talk at previous conferences. This is a much needed topic at this time, and their work is greatly appreciated.

This was also a great presentation! Very good information, great way to shed some light on these difficult conversations and show how crucial they are.

Well done. They handled the medical emergency disruption very professionally.

Liked the use of video at this point in the day.

Excellent!

Harrowing events!!!!

Amazing presenters and a presentation that everyone should see.

Too bad for the interruption. would like to have had a link to the documentaries

This presentation was great, but very emotional. I thought the presenters did a great job of adapting to the unforeseen situation, and modifying their presentation. I did not feel I "missed out" due to the altered schedule. Wish there could have been a 5 minute break after this session to help decompress.

Very insightful to hear the background behind the documentary film series.

Excellent!

Excellent! Good presenters. This information is MUCH needed in America so that death can become easier for people.

Excellent overall. A little too rah rah about their films and awards. Handled the interruption with respect and aplomb.

I need to watch these films!!! Very inspiring and truthful!

Like this presentation so much!!!

Inspiring presentation and look forward to hearing more in the future.

EXCELLENT! My favorite-loved hearing all the stories. Would love to have access to the video series to use for staff

Too bad it was cut short, greatly enjoyed this presentation.

Very interesting!

Very moving presentation.

Hearing the personal stories of the presenters made the overall conference have a deeper meaning. Also, getting a visual reference for the palliative and end of life fields was appealing in the midst of heavy conversations.

Very informative!

Would have liked to see the whole presentation.

Excellent!!

Terrific presentation Wish that it hadn't been unfortunately interrupted Hope that you will bring them back next year \*\*\*\*\*

This was very interesting to me. Really displayed the importance of hospice care in the US.

These men are always great presenters...I learn something new each time. Even with having to stop the presentation for a bit, they picked up quickly.

Excellent!

Wishes we could have heard more from these two but due to unforeseen circumstances not able to. Very inspiring

Excellent presentation! I was a bit intimidated by the amount of time allotted for the presentation but was quickly caught up in the presentation. Both speakers did an excellent job of presenting including personal stories and humor.

Fabulous!

Although interesting, was not my favorite key note speaker.

Would like to know where I can find these videos....very interesting.

Wonderful presentation, great speakers!

Excellent presentation! Very good speakers with great camaraderie and conviction. Both have a very good presence and are enjoyable to listen to.

This was probably my favorite presentation of them all. They were so eloquent in their presentation.

VERY INTERESTING CONVERSATION. LOVED THE FILMS

Can't wait for the 3rd Documentary!! I've seen both Consider the Conversation documentaries several times, but each time I see them, more and more sinks in!! THANK YOU!!

Loved the videos and the presenters

Kudos to the people who responded to the crisis and to the presenters' ability to pick up and complete their presentation.

Excellent! And they did a good job of remaining calm and professional when the medical emergency occurred in the back of the room.

Exceptional!!!!

Great. Very inspiring.

It was a little dry at times

Had seen their first film presented at a conference sponsored by Agrace but not aware of film #2 or an upcoming one. powerful

Excellent! These presenters were able to capture and maintain my attention with their multiple modalities of "teaching." I left feeling as though there is so much more we can learn from their journey through this mission interviewing and film making. The clips they shared, incorporating their own personal stories, were powerful.

Excellent. Could of listened for hours

Fabulous teachers and presenters.

Wish we could have watched a little bit more of the film.

These guys are awesome! What a great talent to be able to bring such a sobering topic to film.

I was familiar with Consider the Conversation and had watched the videos before, but I had never had the opportunity to hear the two men tell their stories and why they are doing these documentaries. They are engaging speakers and the presentation was beneficial to my work. I could listen to Terry and Mike speak for hours! I will be watching their two documentaries in the near future. Brilliant work!

It was a pleasure to hear/meet these two men. Their mission is to be truly admired.

Adapted quickly and seamlessly in view of the medical emergency in the middle of the presentation.

Good work guys!!!

Loved this. So well done. Presenters clearly passionate about what they are doing.

The presenters made good points and conveyed interesting stories, especially "Judy" and "Fishing." I would be interested in learning at another time how doctors deal with end-of-life issues, which had been scheduled to be part of this presentation before a medical emergency occurred. I have seen the original "Consider the Conversation" film; this presentation updated my knowledge of Kaldhusdal and Bernhagen's important work.

Excellent presentation!  
Fabulous addition to the conversation.
